

WHY

SPAY and NEUTER YOUR PETS?

It's good for your pets.

Spaying helps prevent uterine infections and breast tumors.

Neutering prevents testicular cancer and some prostate problems.

Spayed and neutered pets live longer than those who are not.

It's good for the community.

Did you know?

A single pair of cats and their offspring can produce 420,000 kittens in 7 years.

According to the ASPCA, about 1.5 million companion animals are euthanized in U.S. animal shelters each year because there are simply not enough homes for them.

It's good for your family.

Spaying and neutering can reduce unwanted behaviors in your pets including:

- Aggressive behavior
- Roaming away from home in search of a mate
- Excessive barking and vocalizing
- Urine marking/spraying

By spaying or neutering your pet,
you'll save money in the long term by
preventing many serious
health problems.

Beat the heat and make an
appointment to spay or
neuter your pet today.
